

Raphael

Profile

I am a passionate and creative user experience designer with a knack for user-centered interface designs. My passion for great user experiences sparked an interest in frontend development. I have deployed my creative skills to help create user-first web applications over the past couple of years. Empathy has been a key factor in my approach to design and development, ensuring products being built meet user needs, yet not compromising on business values. Though user experience design alone is demanding, I do not limit myself but rather use every challenge as an opportunity to learn and improve my skills. I have been able to gain experience in frontend stacks like HTML, CSS, JavaScript, Bootstrap, and VueJs.

Work Experience

UI/UX Designer

July 2020 - Present

- Successfully designed the look and feel of a virtual conference platform for German Chamber of Commerce in Ghana (AHK-Ghana).
- Successfully designed and prototyped the user interfaces for a freelance web application.
- Worked closely with stakeholders to understand business objectives and determine project goals to redesign the user experience of Virtual Platform as a Service.
- Responsible for the visual and experience design for Virtual Platform as a Service for AmaliTech Ghana.

Frontend Developer

April 2020 - Present

- Successfully built a website for UK-based recruiting agency as a freelancer (NorbbanPlus).
- Played the role of a frontend developer to convert UI mockups of a virtual conference platform into mobile responsive VueJS components and views.
- Part of a team responsible for the frontend views development and API consumption of Virtual Platform as a Service for AmaliTech Ghana.
